EXPLORATION AND PRODUCTION (E&P) FOR THE INSURANCE MARKET: UNDERSTANDING RISK IN E&P DRILLING

THE COURSE
This course provides a high level, end-to-end overview of the E&P business, from how we find hydrocarbons, to how we produce them and get them to market. The course is tailored to the interests of the insurance industry and therefore provides a focus on procedures and regulations unique to offshore petroleum exploration, drilling, and production. Definitions and quantifications of E&P risks are examined to support a common understanding of risk between the worlds of E&P and insurance. The course includes a visit to Weatherford’s rig facility in Aberdeen (pending activities on the day) and to North Sea reservoir analogue rock outcrops on the Moray Firth.

SPEAKERS
The course will be led by drilling engineering and geoscience professionals who are active consultants in the field of E&P. Delegates will also be given the opportunity to network with energy specialists during the course’s social events.

SUITABILITY
This specialist course is designed for those who wish to develop an insight into upstream E&P, particularly in the field of risk management. This is likely to include risk engineers, risk managers, insurance advisors, underwriters, treasurers, and accountants. Awareness of the energy industry is beneficial but no technical E&P knowledge is required for the course.

STRUCTURE AND ASSESSMENT
The course is delivered through formal presentations, case-based working, and discussion. Delegates will be expected to actively participate in the wrap-up sessions and team exercises.
**LEARNING OBJECTIVES**

**DAY ONE**

**DRILLING RIG TOUR**
- Identify what basic drilling equipment looks like.
- Understand the health, safety, and environment (HSE) aspects of drilling rigs.

**DAY TWO**

**FUNDAMENTALS – THE SUBSURFACE**
- Identify what hydrocarbon reservoirs look like.
- Explain how oil and gas flows to a well and what drives well productivity.
- Learn how to work out the hydrocarbon resource in a field – the ‘size of the prize’.
- Understand why there is inherent uncertainty in all subsurface predictions.

**FUNDAMENTALS – HOW TO DRILL A WELL**
- Understand the well design, planning, and construction process.
- Identify the equipment required to construct a well.
- Learn about the hazards associated with drilling.
- Understand how those hazards are mitigated.
- Identify and explain the origin of both HSE risk and risk to project success and cost.
DAY THREE

FUNDAMENTALS – CONSEQUENCE MANAGEMENT IN DRILLING
• Understand what is involved in ‘consequence management’.
• Explore and understand the industry standards pertinent to the drilling process.
• Understand the reason for the current focus on well integrity.
• Explore how and why the management of drilling varies between companies and countries.

FUNDAMENTALS – THE SURFACE
• Understand the engineering process of getting hydrocarbons from the well head to the market.
• Learn what happens in a production facility.
• Identify and explain the difference between onshore and offshore production, and the implications on cost and HSE or project risk.

APPLICATION – RISK AND UNCERTAINTY IN E&P
• Establish and understand the difference between ‘risk’ and ‘uncertainty’ in the context of E&P.
• Identify the common behavioural heuristics that impact on decision-making in E&P – particularly our ability to make estimates and to quantify probability.
• Understand how and why attitudes to risk vary between different E&P disciplines (geoscience, petroleum engineering, drilling, surface engineering) and between different E&P companies (small companies versus majors; IOCs versus NOCs).

DAY FOUR

APPLICATION – TIME, MONEY, AND THE MARKET
• Understand the fundamentals of the E&P lifecycle petroleum economics.
• Explain the time value of money and how this impacts E&P financing.
• Explain how drilling costs are worked out.
• Account for the uncertainty in those estimates.

APPLICATION – RISK IN PRACTICE
• Quality control costing for a proposed well.
• Quantify the uncertainty in that estimate.
• Explore and identify the risks associated with a well.
• Update this view as new information becomes available during the drilling of the well.
I would like to register to attend the E&P Course for the Insurance Market (Intermediate) held on April 18-21, 2016 in Aberdeen, my details are as follows:

Delegate Name: …………………………………………………………………………….......

Company: ………………………………………………………………………………….......

Job Title: ………………………………………………………………………………….......

Address: ………………………………………………………………………………….......

Post Code/Zip Code: ………………………………………………………..............

Country: ……………………………………………………....................................

Tel: ……………………………………………………………………………..................

Email: …………………………….……………………………........................

Method of payment:
Cheque payable to Marsh Ltd. For companies requiring invoices, please give billing address and to whom such invoices should be sent, if different from above.

Do you hold the CII Certificate of Insurance? YES □ NO □

*All courses are conducted in English.

We will contact you if we believe the course you would like to attend is not suitable for your knowledge.

Please read the conditions and cancellation policy prior to submitting this form.

Conditions: Provisional bookings are accepted, but must be confirmed within 14 days by completion of a course registration form. Shortly after confirmation of the booking an invoice will be sent to you. Payment is required no later than eight weeks before the course starts, or immediately for bookings made within the eight weeks of the beginning of the course. The course cost is exclusive of VAT. We reserve the right to change details of the programme and speakers if the need arises. Whilst every effort has been made to verify the accuracy of the information presented at the course, neither Marsh Ltd nor its affiliates can accept any responsibility or liability for reliance by any person on this information.

Cancellations: Bookings may be cancelled at any time up to two weeks before the start of the course and a refund will be made, less a 20 percent administration fee. No refund will be made for cancellations made after that date, although a substitute delegate will be accepted at any time in place of the person booked. If Marsh has to cancel the event for any reason, a full refund will be made. Marsh Ltd accepts no liability if this event does not take place for whatever reason.
